Technical Data Sheet Keno™cid 210 1/4

Concentrated disinfectant based on quaternairy ammonium and glutalaldehyde

Product Description

Keno[™]cid 210 1/4 is a concentrated disinfectant for the food industry. The product can be used for the disinfection of food contact surfaces, floors, walls and machines by spraying at low pressure.

Properties

Keno™cid 210 1/4 has a broad spectrum bactericidal activity.

Composition: according to regulation (EU) 528/2012: 80 gr/L didecyldimethylammoniumchloride (CAS no.: 7173-51-5) 5 gr/L glutaraldehyde (CAS no.: 111-30-8) Utilisation in PT4 (Biocide in the food industry). Only for professional use. Hydrosoluble solution.

Direction of use

Clean all surfaces thoroughly and remove all dirt and fat. Spray all surfaces with a 0.5% solution of Keno™cid 210 1/4 at low pressure with a contact time of 5 minutes for bactericidal activity. Rinse with clean water.

Check the Marketing Authorization of your country for more information.

Specifications

Physical state	Liquid
Colour	Colourless
pH	ca 4.5
Freezing point	-10 °C
Boiling point	100 °C
Density	ca 0.98 kg/l
Solubility in water	100 %

Storage and Disposal

Keep only in the original container in a cool, well ventilated place. Keep container closed when not in use. Hazardous waste. Avoid release to the environment. Dispose in a safe manner in accordance with local / national regulations.

Safety instructions for the user

Avoid contact between alkaline and acid products. Always test the product first on a small surface.

Consult your Cid Lines sales' person for a suitable cleaning- and disinfecting program that is adjusted according to the contamination and the specific conditions of the company.

Before use, please check the MSDS.

Use biocides safely. Before use, read the label and the information concerning the product.

Not all CID LINES products are available in all countries. For information about availability of a specific product, please contact your CID LINES dealer.
